

NEW PRODUCTS 2024

THIRD GENERATION TILTROTATORS

High performance tiltrotators with steel casted components and optimized tilt geometry, lubrication free bearings, OptiLube onboard lubrication system and our patented LockSense technology - a sensor system for secure work tool locking.

ROTOR COUPLERS FOR ADVANCED ROTATION TECHNOLOGY

Compact design and easy installation. The high flow swivel joints enable the use of high flow-demanding tools such as hydraulic breakers, compactors and grapples.

SMOOTH OPERATION WITH UNMATCHED LOW HYDRAULIC FLOW

Compactors designed for smooth operation thanks to intuitive maneuverability, enabling precise positioning and optimal compaction. High compaction force with low oil flow.

GRAPPLES WITH ENHANCED DESIGN

Multi grapples and sorting grapples are lighter in weight yet stronger in design, and the overall height has been reduced.

Both the compactors and grapples are perfect for use under the tiltrotator and are upgradeable from S to SQ interface!

STEELWRIST
EARTHMOVING EFFICIENCY

Steelwrist
Product Portfolio

The key to unlock your excavator efficiency

Enablers and Automation

The core of the Steelwrist product offering includes quick couplers, tilt couplers, tiltrotators and from 2024 rotor couplers that together with the control system make up the foundation for higher excavator efficiency.

Regardless if your need is a safe and robust quick coupler, a more advanced tilt- or rotor coupler, or the most efficient tiltrotator, we have the solution for you.

We introduced the patented Front Pin Lock technology already in 2012 which pushed the industry to focus more on safe quick couplers. Since then we have introduced solutions that increase safety even further.

Our SQ technology will convert our products to automatic quick coupler systems connecting both hydraulics and electrical signals in one movement. No need to get out of the cab for any tool change.

Work Tools

A job needs a work tool and a work tool needs an excavator - not the other way around. That's the starting point when we think about how to increase your excavator efficiency.

Steelwrist work tools include buckets such as grading-, digging-, cable-, v-ditch-, sorting-, skeleton- and utility buckets as well as rippers, pallet forks, asphalt cutters and grading beams.

Our powered work tools include a range of multi-, sorting- and finger grapples as well as pallet forks, sweepers and compactors.
